

EZE IFEANYI TRUST

n8n Automation Specialist | Workflow & AI Automation Engineer
Port Harcourt, Nigeria • 09065356388 • trustlugard9@gmail.com

PROFESSIONAL SUMMARY

n8n automation specialist who designs, builds, and ships production-grade workflow systems that connect messaging platforms, CRMs, databases, payment rails, and AI models into reliable end-to-end automations. Founder of IchakaSystems, where I deliver multi-tenant, AI-powered n8n systems for businesses across messaging, sales, fintech, and operations. Strong foundation in Computer Science with a track record of turning manual, repetitive processes into autonomous, self-running workflows.

TECHNICAL SKILLS

Automation Platform: n8n — multi-step workflows, sub-workflows, error handling, webhooks, scheduled & event triggers, HTTP request nodes, custom integrations, multi-agent orchestration

AI / LLM: OpenAI API, prompt engineering, multi-agent system design, conversational AI agents

Integrations & APIs: WhatsApp Cloud API, Pipedrive, Gmail, Paystack, REST APIs, webhooks

Data & Backend: Supabase (PostgreSQL), Python

Solution Domains: Conversational AI agents, B2B sales automation, fintech (payments, BNPL), social media automation, operations automation

PROFESSIONAL EXPERIENCE

IchakaSystems — Founder & n8n Automation Specialist

2024 – Present

AI automation studio building n8n workflow systems for businesses — Port Harcourt, Nigeria

- Founded and run an AI automation studio delivering end-to-end n8n workflow systems that connect messaging, CRM, database, and payment tools into autonomous business processes.
- Built a multi-tenant WhatsApp pharmacy refill automation system in n8n integrating WhatsApp Cloud API, Supabase, Python, OpenAI, and Paystack — automating customer conversations, refill scheduling, and payment collection across multiple business accounts from a single workflow architecture; now serves as the reference architecture for subsequent builds.
- Designed a multi-agent B2B sales automation system in n8n with three specialized sub-agents — Prospecting, RevOps, and SDR — orchestrated across Pipedrive and Gmail to automate lead research, pipeline operations, and outbound outreach.
- Developed an AI Social Media Manager composed of six coordinated n8n sub-agents that automate content planning, drafting, and scheduling; onboarded the first client onto the system.
- Built an equity portfolio rebalancing workflow in n8n with live price data, automated push notifications, and scheduled email reporting.
- Engineered a Buy-Now-Pay-Later (BNPL) workflow system for gadget vendors, automating application intake, eligibility checks, and repayment tracking, with a roadmap of additional BNPL verticals.
- Currently building Restocka — a WhatsApp-based AI ordering and collections agent on n8n for distributors and informal retailers.

SELECTED PROJECTS (SNAPSHOT)

- **Multi-tenant WhatsApp Pharmacy Refill Agent** — n8n, WhatsApp Cloud API, Supabase, Python, OpenAI, Paystack.
- **Multi-Agent B2B Sales System** — n8n with Prospecting, RevOps & SDR sub-agents; Pipedrive + Gmail.
- **AI Social Media Manager** — six-sub-agent n8n system for planning, drafting & scheduling.

- **Equity Portfolio Rebalancer** — n8n workflow with live pricing, push alerts & email reports.
- **Vendor BNPL System** — n8n automation for application intake, eligibility & repayments.

LEADERSHIP & ACTIVITIES

- **Director of Transport (two terms)** — University of Port Harcourt. Led transport logistics and coordination for the student body.
- **Provost** — Nigerian Association of Computer Science Students (NACOSS), Rivers State.
- **Course Representative** — University of Port Harcourt. Liaised between students and faculty.

EDUCATION

B.Sc. Computer Science

2025

University of Port Harcourt, Rivers State, Nigeria
